

Name Student A

Date 4/26/12

Solve addition problems, decide if you need to regroup, and explain.

Explain the steps you took to solve the problems correctly.

1. $617 + 49$

Did you need to regroup?

Yes No

How did you know?

Solve:

$$\begin{array}{r} 617 \\ + 49 \\ \hline 666 \end{array}$$

666

because if you line them up 9+7 is bigger than 10.

- go back and check
- understand
- read the q. carefully
- make it in complete answer
- look at the simple
- regroup the right
- don't forget to put the one on top

Name Student B

Date 4/26/12

Solve addition problems, decide if you need to regroup, and explain.

Explain the steps you took to solve the problems correctly.

1. $617 + 49$

Did you need to regroup?

Yes No

How did you know?

Solve:

$$\begin{array}{r} 617 \\ + 49 \\ \hline 666 \end{array}$$

666

I know because 9+7 equals 16.

- Label
- Check
- Show work
- understand
- what do I know
- what am I trying to find?
- regroup.

Name Student C

Date 4/26/12

Solve addition problems, decide if you need to regroup, and explain.

Explain the steps you took to solve the problems correctly.

1. $617 + 49$

Did you need to regroup?

Yes No

How did you know?

Solve:

$$\begin{array}{r} 617 \\ + 49 \\ \hline 666 \end{array}$$

I know because 16 is a two digit number.

- 1st I regrouped the 15.
- 2nd I put the extra 1 in the 10's
- 3rd I solved the 10's place
- 4th I solved the 100's.
- _____
- _____
- _____
